

 **EXCELTA[®]**
SINCE 1957

Cobaltima[®] Alltima[®] Precista[®] Optima[®] Neverust[®] Selecta[®] LazerLine[®] Ergo-Tweeze[®] IntelliTweeze[®] TweezerMeier[®]

Over sixty years ago, the American aerospace industry was faced with a problem. As technology advanced, electronics were getting smaller, more complex, and harder to assemble and maintain. This problem needed solving, and a young entrepreneur named Jerome Dalseme thought he carried the answer in his briefcase, a selection of precision watchmakers tools from Europe.

When the giants of aerospace were presented with these purpose-built, high-precision tweezers, they found the tools they needed. Many of these tweezers were adopted and remained in use for decades. After this success, Mr. Dalseme founded Excelta on the principle of staying one step ahead of the changing needs of its customers and always offering a tool Precisely Right for the job.

Our catalog began as a modest selection of pliers and tweezers which has now grown to encompass over 1,500 hand tools. We pay close attention to our customers in military and consumer electronics, in medical device manufacturing and in schools and labs across the country to ensure Excelta stocks the tools they need.

Excelta's Special & Customs Application Department are experts in adapting tools to meet hyperspecialized needs. Our California-based manufacturing plant hosts an innovative R&D department and works diligently to develop groundbreaking new designs for the hand tools of tomorrow.

Industry is constantly changing and Excelta is committed to making sure you're always reaching for a tool that is Precisely Right for the task at hand.

9200 SL Series

New Slim Line Cutters - New geometry, improved LazerLok™ joint system, ESD-safe slim handles and black oxide finish to inhibit rust and glare.

7376E

New subminiature angulated tip cutter. Our smallest tip cutter yet. 50° tip angle makes for excellent visibility in limited access areas or microscopic work.

EI Series

New Italian made cutters - 3 Star cutters for general use. Hardened jaws allow greater tool life and smooth clean cuts.

M-159 Series

New miniature Carbofib™ tweezers. Protect against ESD damage(conductive), Nicking, Scratching and Marring with these new 3 1/2" softip tweezers. Ideal for working under a microscope or in areas with limited accessibility.

5 levels
of precision!

5 levels
of pricing!

We offer a wide range of materials and designs for any application.

For the most critical applications, the Excelta Five Star line offers ultra-precision with the most advanced materials available.

For demanding applications, the Excelta Four Star line meets and exceeds high precision requirements.

The Excelta Three Star line offers the widest range of products designed for pharmaceutical, medical manufacturing, military and electronic assembly.

When precision is required and price is a concern, the Excelta Two Star line fills most requirements.

The One Star line offers quality products at the most economical price.

Call us at Excelta Corporation or contact your local Excelta Sales Representative to find tools "*Precisely Right*" for you.

CUSTOM DESIGN SERVICE

As the leader in tool technology,
Excelta knows every application is unique. Our Custom Design facility can work from your schematic to manufacture any tool to your specifications. Or, if you prefer, our experienced designers can diagnose your needs and design a tool “Precisely Right” for your unique application.

Whether you need a single tool to handle special parts under unique conditions, or a supply of custom tools to crimp, cut, place or extract parts, Excelta's Custom Design Service has the experience, ingenuity and capability to meet your needs.

Precision.

Welcome to the new era in wire cutting technology!

LazerLine

Excelta has pioneered the combined use of Laser technology with advanced CNC machining to build the finest grade cutter available. We start with premium steel, laser cut for consistency, and milled to exact specifications at our headquarters in Buellton, CA. Our cutting blades are induction hardened to

★★★★★ Ultra Precision LazerLine

63-65 Rockwell C for durability, then CNC ground to within a thousandth of an inch to achieve unsurpassed sharpness and an unbelievably clean cut. Excelta's LazerLine series represents state of the art cutting tools, and is Precisely Right for all your cutting needs.

SIDE CUTTER

Selection Guide

Head Shapes

Oval Head

Tapered Head

Tapered Relieved Head

1. Choose head shape based on the following:

- The oval head cutter is the most common head shape for cutting tools. It allows for the maximum amount of 'metal' behind the cutting edge delivering an extremely long tool life.
- The tapered head was developed to allow the cutting tool to get into those "hard to reach" areas. It was designed more along diagonal lines with less "metal" behind the cutting edge.
- The tapered/relieved head allows for the most access to "hard to reach" areas. In addition to having a diagonal profile, the face has been relieved allowing even greater access.

Type of Cut

Semi Flush
0.010 Bevel

Optimum Flush
0.005 Bevel

Lazer Flush
0.000 Bevel

2. Choose 'Type of Cut' based on the following:

- Semi-Flush cutters have a cutting edge with a .010" bevel, which produces more cuts than a maximum flush cutter but leaves a 'pinch' on the lead/wire.
- Optimum-Flush cutters have a cutting edge with a .005" bevel, which produces a smaller 'pinch' on the lead/wire than a semi-flush cutter. The smaller bevel means fewer cuts than a semi-flush cutter.
- Lazer-Flush cutters have no bevel producing a pure, clean cut with no 'pinch' on the lead/wire. The cutting edges are extremely sharp. Cutting life is once again reduced over either of the above.

Hard Wire - Annealed Stainless Steel, Nitinol, Titanium, Polypropylenes. Tensile Strength 116,000/19,000 PSI
Soft Wire - Copper Wire, Rubber, Polyurethanes and PTFE. Tensile Strength up to 30,000 PSI

SHEAR CUTTER | CABLE CUTTER

★★★ FINE PRECISION | DEPANELIZER

Cushion Grip - Surface Resistivity 10^{10} ohms/sq.

51I-6 - Cable Cutter

Precision cable cutter is recommended for cutting stranded soft cables and wire up to .5" (12.5mm) in diameter. The locking device keeps cutting jaws in closed position when not in use. The tool is 6" (150mm) long and made of Stainless Steel.

51I-6DP - Depanelizer

Depanelizing tool has a thin jaw designed to cut the tabs on PC boards. Longer handles provide more leverage when cutting. The head is designed to fit a .07" (1.75mm) or larger slot, is 6" (150mm) long and made of Stainless Steel it features a locking device which keeps cutting jaws closed at rest.

EXCELTA®
PRECISION PLIERS

PRECISION PLIERS

Excelta makes a wide range of pliers for general electronics repair and fine mechanical work. Precision lap joints ensure precise jaw alignment. ESD safe grips and available ergonomic handles make finding the exact plier you need easier than ever.

The Size

Miniature Pliers are self-opening and have the smallest tips. They are made of stainless steel to prevent oxidation, are cleanroom safe and the overall length is 3" (75mm).

Small Pliers feature dual leaf springs and soft cushion ESD safe (10^{10} ohms/sq) grips. They are made of stainless steel to prevent oxidation and are 4.75" (120mm) in overall length.

Small Ergonomic Pliers feature dual leaf springs and soft cushion ESD safe (10^{10} ohms/sq) grips. They are made of stainless steel to prevent oxidation and are 6" (150mm) in overall length.

Medium Pliers are offered in three different precision levels:

- ★★★★★ The **700 series** features ESD safe (10^9 ohms/sq) molded grips, polished and hand-finished jaws and are made in the USA of carbon steel with flame hardened tips. The overall length is 5" (125mm).
- ★★★ The **11 series** features cushion ESD safe (10^{10} ohms/sq) grips and dual leaf springs, made of stainless steel with flame hardened tips. The overall length is 4.8" (120mm).
- ★★ The **2800 series** feature molded ESD Safe (10^9 ohms/sq) grips and dual leaf springs, and made of stainless steel. The overall length is 5.75" (145mm). The 2800L series are 6" (150mm) in overall length and feature cushioned ESD safe grips (10^{10} ohms/sq) and dual leaf springs.

Large Pliers

- ★★ The **2900 series** Large Pliers all feature dual leaf springs and soft cushion ESD safe (10^{10} ohms/sq) grips. They are made of stainless steel. The overall length is 6.5" (165mm).

Tip Modifications

- D** **Single Cut Serrations** can be added to the inside jaws of most plier tips. Serrations help hold parts when handling and manipulating. Example: 2949D
- DX** **Double Cut Serrations** can be added to the inside jaws of most pliers. These serrations are finer and should be used when handling small parts and wires. Example: 2949DX

Specialty Pliers

Soft Tip Replaceable Jaw Pliers - Soft tips are used for straightening wire or leads without nicking or scratching the lead.

Wide Jaw Pliers - Have very wide jaws for straightening, picking, & placing wide items. The jaws are replaceable.

Concave/Convex Pliers - Feature one concave jaw and one round jaw for bending/forming wires or leads.

MINIATURE | STAINLESS STEEL

Self-Opening Pliers

★ ★ FINE PRECISION

These miniature pliers are ideal for handling small items too large to handle with tweezers, but too small to handle with conventional pliers. They are open at rest and cleanroom safe.

Tubing Cutters (Replaceable Blade)

Length 5.25" (131mm)

These tubing cutters give a nice clean square cut to a variety of soft tubing materials for inserting fittings, couplings and quick release valves. The stainless steel blades are replaceable and come with soft cushioned ESD safe grips (10^{10} ohms/sq). They will cut most types of medical tubing including silicone, rubber, vinyl, nylon, polyurethane, polypropylene, polyethylened, Tygon®, Bio-Sik®, Autoprene® and Viton®. Replacement Blade 2922-14-X.

EXCELTA®
CUSTOM DESIGN SPECIALS

CUSTOM DESIGN SPECIALS

As the leader in tool technology, Excelta knows every application is unique. Our Custom Design facility can work from your schematic to manufacture any tool to your specifications. Or, if you prefer, our experienced designers can diagnose your needs and design the tool "Precisely Right" for your unique application.

Whether you need a single tool to handle special parts under unique conditions, or a supply of custom tools to crimp, cut, place or extract parts, Excelta's Custom Design Service has the experience, ingenuity and capability to meet your needs.

The following pages include Excelta tools that have been designed with a very special application in mind. If you don't see the tool you're looking for, contact our Custom Design Department at **(805) 686-4686** or log on to www.exceltacustomtools.com and we will design the custom tool to fit your application.

CUSTOM TOOLS

ULTRA PRECISION

500 Series **Molded Grip** - Surface Resistivity - 10^8 ohms/sq
900 Series **Cushion Grip** - Surface Resistivity - 10^{10} ohms/sq

500-108-US

5.5" (137mm)

Designed to bend leads to 45° then cut the lead to .050" keeping component in place when soldering. Recommended cutting capacity is .025" (.63mm) dia. soft wire. Featuring a molded ergonomic grip with dual leaf springs.

930E-1

5.5" (137mm)

Designed to cut leads to .060" (1.5mm) then bend the lead keeping the component in place when soldering. Cutting capacity is .032" (.8mm) dia. soft wire. Featuring soft cushioned ergonomic grips with dual leaf springs.

530E-1-US

5" (125mm)

Designed to cut leads to .060" (1.5mm) from the PC board, then bend the lead to 30° keeping components in place when soldering. Cutting capacity is .025" (.63mm) dia. soft wire. Featuring molded ergonomic grips with dual leaf springs.

500-88-US

5" (125mm)

Designed to form a consistent standoff and cut the lead to length on most popular radial lead components. Cutting capacity is .025" (.63mm) dia. soft wire. Featuring a molded ergonomic grip with dual leaf springs.

907

6" (150mm)

Designed to cut leads to .030" (.75mm) and swages the end of the lead to prevent it from falling out of the P.C. board. Cutting capacity is .032" (.8mm) dia. soft wire. Featuring soft cushioned ergonomic grips with dual leaf springs.

500-89-US

5.5" (137mm)

Dog leg lead forming plier/cutter is designed to increase or decrease the center dimension on radial lead components. The added shear cutter saves component prep time. Cutting capacity is .025" (.63mm) dia. soft wire. Featuring a molded ergonomic grip with dual leaf springs.

500 Series **Molded Grip** - Surface Resistivity - 10^8 ohms/sq
900 Series **Cushion Grip** - Surface Resistivity - 10^{10} ohms/sq

500-89B-US

5.5" (137mm)

Dog leg lead forming plier/cutter is designed to increase or decrease the center dimension on radial lead components. The added shear cutter saves component prep time. Cutting capacity is .025" (.63mm) dia. soft wire. Featuring a molded ergonomic grip and dual leaf springs.

900-88B

5.75" (144mm)

This stress relief forming plier/cutter is designed to form stress relief and cut leads to a specific dimension in one easy step. Cutting capacity is .020" (.5mm) dia. soft wire. Featuring soft cushioned ergonomic grips with dual leaf springs.

907-88

6" (150mm)

This stress relief forming plier/cutter is designed to form a standoff and cut leads to length on most popular radial lead components. Cutting capacity is .030" (.75mm) dia. soft wire. Featuring soft cushioned ergonomic grips with dual leaf springs.

907-89

5.75" (144mm)

Dog leg lead forming plier/cutter is designed to increase or decrease the center dimension on radial lead components. The added shear cutter saves component prep time. Cutting capacity is .030" (.75mm) dia. soft wire. Featuring soft cushioned ergonomic grips with dual leaf springs.

907-88C

6" (150mm)

The smaller design of this tool will "Standoff" the component closer to the PC board. The added Shear cutter saves on component prep time. Cutting capacity is .025" (.63mm) dia. soft wire. Featuring soft cushioned ergonomic grips with dual leaf springs.

LEAD FORMING

Cutters/Formers

CUSTOM TOOLS

ULTRA PRECISION

500 Series **Molded Grip** - Surface Resistivity - 10^8 ohms/sq
900 Series **Cushion Grip** - Surface Resistivity - 10^{10} ohms/sq

554-TXC-US

5.5" (137mm)

Will form one lead in and one lead out at the same time on most radial type components. The added shear cutter saves component prep time. Cutting capacity is .025" (.63mm) dia. soft wire. Featuring a molded ergonomic grip with dual leaf springs.

500-13A-US

5" (125mm)

.375" (9.38mm) flat pack forming plier/cutter will form a "Gull Wing" and cut multiple leads to length on various types of flat packs. Cutting capacity is .010" (.25mm) soft wire. Featuring molded ergonomic grips with dual leaf springs.

900-10

5.5" (137mm)

Will cut and form 3 or 5 leads on a TO-220 style component. Leads will be formed to the bottom of component body for surface mounting. Featuring soft cushioned ergonomic grips with dual leaf springs.

500-13B-US

5.5" (137mm)

.250" (6.25mm) flat pack forming plier/cutter will form a "Gull Wing" and cut multiple leads to length on various types of QFP and SOIC packages. Cutting capacity is .010" (.25mm) soft wire. Featuring molded ergonomic grips with dual leaf springs.

500-103-US

5.5" (137mm)

Designed to form TO-220 style transistors with 3 or 5 leads. Component leads are formed .200" (5mm) from the body of the component. Featuring molded ergonomic grips with dual leaf springs.

907-89B

5.75" (155mm)

Dog leg lead forming plier is a heavy duty plier designed to increase or decrease the center dimension on radial lead components. Featuring soft cushioned ergonomic grips with dual leaf springs.

500 Series **Molded Grip** - Surface Resistivity - 10^8 ohms/sq
900 Series **Cushion Grip** - Surface Resistivity - 10^{10} ohms/sq

500-92-US

5.5" (137mm)

TO-92 lead forming plier has slots on the outside jaw to help the plier fit between the leads of a TO-92 and flare them out .050" (1.25mm) forming a "Standoff" in the lead wires. Featuring molded ergonomic grips with dual leaf springs.

554B-US

5.5" (137mm)

Stress relief forming plier is designed to form a consistent relief of a variety of components. It's recommended for .020" (.5mm) or smaller wire. Featuring molded ergonomic grips with dual leaf springs.

500-11-US

5.5" (137mm)

Off-set lead forming plier is used to form a single lead on TO-220 style transistor. The lead can be formed .100" (2.5mm). Featuring a molded ergonomic grip with dual leaf springs.

554F-US

5.5" (137mm)

Stress relief forming plier is our smallest forming plier used to form a standoff on component leads of .020" (.5mm) dia. or smaller. Featuring molded ergonomic grips with dual leaf springs.

554A-US

5" (125mm)

Stress relief forming plier is designed to form stress relief for transistor and resistor leads. The tool design will make consistent standoff on a variety of components. Recommended for .025" (.63mm) and smaller wire. Featuring molded ergonomic grips with dual leaf springs.

954A

6" (150mm)

Stress relief forming plier is designed to form a consistent stress relief on a variety of components. Similar to the 554A-US, made on a larger frame, these pliers can form leads and wires up to .030" (.75mm) dia. Featuring soft cushioned ergonomic grips with dual leaf springs.

954B

5.75" (155mm)

Designed to form a consistent standoff in a variety of components. Similar to the 554A-US, made on a larger frame these pliers can form leads and wires up to .035" (.88mm) diameter. Featuring cushioned ergonomic grips with dual leaf springs.

554-TX-US

5.5" (137mm)

Stress relief forming plier will form stress relief in most radial lead components. Designed to form one lead in and one lead out in a single operation. It's recommended for .025" (.63mm) dia. or smaller wire. Featuring molded ergonomic grips with dual leaf springs.

909-4

5" (125mm)

Stress relief forming plier provides stress relief forming for transistor and resistor leads. Tool design is versatile in a variety of applications. Recommended for .035" (.88mm) wire or smaller. Featuring soft cushioned ergonomic grips with dual leaf springs.

554-TXB-US

5" (125mm)

Stress relief forming plier will form stress relief in most radial lead components. Designed to form one lead in and one lead out in a single operation. Recommended for .025" (.63mm) dia. or smaller leads and wires. Featuring a molded ergonomic grip with dual leaf springs.

909-4B

6.25" (156mm)

Stress relief forming plier may be used for many types of components. The smaller dimensions keep components close to the PC board. Recommended for .030" (.75mm) or smaller leads and wires. Featuring soft cushioned ergonomic grips with dual leaf springs.

554-3RB-US

5.25" (131mm)

Lock-in lead forming plier will form an "s" bend on a component lead, enabling the component to stay in place when soldering. Recommended for .025" (.63mm) dia. or smaller leads and wires. Featuring molded ergonomic grips with dual leaf springs.

500 Series Molded Grip - Surface Resistivity - 10^8 ohms/sq
900 Series Cushion Grip - Surface Resistivity - 10^{10} ohms/sq

907-210A

6.75" (169mm)

90° forming tool that is adjustable and designed for TO-247 size components.

500-210C-US

5.5" (137mm)

90° lead forming tool with the bend length specified as required. Example of how to order: 500-210C-US-.050"

907-104A

5.5" (137mm)

90° forming tool designed for TO-247 package lead forming. Leads #1 and #3 will be formed at .150" (3.75mm) from the body. Lead #2 will be formed at .300".

500-15-US

5.5" (137mm)

TO-220 stagger lead forming vertical mount. Leads #1 and #3 will be formed with a .075" offset, and lead #2 with a .075" (1.88mm) offset in the opposite direction for .150" (3.75mm) lead centers.

LEAD FORMING

Formers

CUSTOM TOOLS

ULTRA PRECISION

500 Series **Molded Grip** - Surface Resistivity - 10^8 ohms/sq

500-104-US

5" (125mm)

Transistor forming plier is used in forming 3 leads on a TO-220 style transistor. The two outside leads will be bent .200" (5mm), while the center lead is bent .300" (7.5mm) from the body of the component. Featuring molded ergonomic grips with dual leaf springs.

500-210-US

5.5" (137mm)

Multiple lead forming plier is designed to bend the leads on LEDs and other multiple lead components. Leads are formed to 90° and .100" from the component body without damage. Recommended for use on .025" diameter leads and wires. Featuring molded ergonomic handles with dual leaf springs.

500-95B-US

5.5" (137mm)

Dog leg lead forming plier is designed to form a "Dog Leg" bend in the lead wire. This tool can be used to increase or decrease the center dimensions of the radial lead components. Recommended for .030" (.75mm) or smaller leads and wires. Featuring molded ergonomic grips with dual leaf springs.

500-210A-US

4.75" (119mm)

Adjustable multiple lead forming plier is designed to form transistor leads with .100" (2.5mm) center spacing. Leads are formed at 90° for through-hole mounting. The distance from the component body to the end is adjustable from .100" (2.5mm) to .300" (7.5mm). Featuring molded ergonomic grips with dual leaf springs.

500-104B-US

5" (125mm)

Transistor forming plier is an elaborate design for forming 5 leads on a TO-220 component in one easy operation. The tool will ensure uniformity of difficult lead alignment. Featuring molded ergonomic grips with dual leaf springs.

500 Series **Molded Grip** - Surface Resistivity - 10^8 ohms/sq

505-US

5.5" (137mm)

Our 505 Series pliers have been designed to handle DIP/IC packages. The chart will help you quickly find the size you are looking for.

Part#	A	B	C	Pins

Custom size pliers available upon request.

5 Levels of Precision

ULTRA PRECISION

Made in Switzerland from 40% cobalt alloy steel, harder than stainless steel, anti-magnetic, excellent resistance to corrosion and resistant to temperature up to 500°C (932°F). Used with very high magnification.

EXTREME PRECISION

Made of Titanium Alloy, Super Neverust (AISI 904L), Diamond Coated tips (AISI 316L) and Ceramic Coated tips (AISI 440). These three materials are stronger than the standard AISI 303/304 stainless steel, extending the life of the tips. In addition, solder will not stick to the titanium alloy and it is very light weight and temperature resistant.

HIGH PRECISION

Precision grade tweezers made from neverust® anti-magnetic stainless steel, stainless steel, or carbon steel and are manufactured in Switzerland with high precision points. The perfect choice when working under 5X to 10X magnification.

FINE PRECISION

Standard grade "PI" tweezers have fine precision points at a lower cost. Used with low Magnification.

GENERAL PRECISION

General Precision Grade "SE" tweezers are manufactured for general purpose work when magnification is not required.

TWEEZER TECHNICAL INFORMATION

The most critical parts of any tweezer or forcep are the points. Finishing the points is an art form perfected over years of practice. Whether working on microchips or working on human cells, microscopy is playing a significant part in the work being done today. This work requires extremely precise tweezer points that meet perfectly. Excelta tweezers cover the spectrum!

Micro Fine Tips

When working under high magnification with tweezers/forceps it is critical that the points are exactly the same size and meet precisely. Many of these tweezers have relieved tips allowing for excellent visibility under a scope.

Fine Tips

These very fine tipped tweezers can be used for low magnification applications, or for work being done without the use of a scope.

Medium Tips

General purpose tweezers with semi-fine tips are used for any work done without a microscope.

Blunt Strong Tips

Blunt strong tipped tweezers are the work horse of tweezers. Most of these tweezers can be dropped without much damage to the tips. They last much longer than fine or micro fine tipped tweezers, but lack the accuracy of finer tipped tweezers.

Flat Tips

Flat tip tweezers are used for everything from placing and removing labels, to picking up flat items like lenses. These tips are generally rounded.

Application Specific Tips

We create application specific tweezers for ANY application. Over the years certain applications have repeated, prompting us to categorize these application specific tweezers. Those categories include cutting tweezers, paddle tip tweezers, wafer tweezers, miniature tweezers, cross-action tweezers, ergonomic tweezers and component handling tweezers.

Tweezer Add-ons

We offer a wide variety of customizations that can be added on to most items found in this tweezer section. The add-on code simply needs to be added to the part number (example 3C-SA-MP). If you have questions or would like more information about add-ons do not hesitate to call.

TC

PTFE Coating is applied 1 ½ " up the tip and helps prevent marring and scratching (metal to metal) contact. Can be applied in 1.5 mil, 3.0 mil, and 5.0 mil thickness.

Example - **3C-SA-TC15**

FLTC

Full length PTFE Coating is applied to the entire tweezer and helps prevent marring and scratching (metal to metal) contact. Can be applied in 1.5 mil, 3.0 mil, and 5.0 mil thickness.

Example - **3C-SA-FLTC50**

ET

Ergonomic Foam Cushion Padding for tweezers. The soft cushion grip helps to relieve the "PINCH GRIP" when using tweezers for long periods of time. The surface resistivity is 10¹⁰ ohms/sq.

Example - **3C-SA-ET**

MP

Mirror Polished tweezers have radiused edges and polished inside points to prevent nicking and scratching when handling delicate parts.

Example - **3C-SA-MP**

Tweezer Add-ons

D

Single Cut Serrations can be added to the inside points of most tweezers. Serrations help hold parts when handling and manipulating.

Example - **3C-SA-D**

DX

Double Cut Serrations can be added to the inside points of most tweezers. These serrations are finer and should be used when handling small parts and wires.

Example **3C-SA-DX**

MZ

MZ tweezers feature radiused inside edges and blunted tips.

Example **3C-SA-MZ**

WO

Wide Opening tweezers are designed to have the tips parallel .5" (12.5mm) apart at rest.

Example **3C-SA-WO**

WHY COBALTIMA®?

COBALTIMA® - The perfect combination of strength and durability. Superior to the best stainless steel, these tweezers and forceps have points insensitive to fatigue and they maintain elasticity. The hardness of the points is progressive, reaching its peak in the deployment zone where we have measured a Rockwell C hardness of 63/64 for model 5-CO.

Temperature of Fusion	(°C)	450-1460
Volunteer Mass	(g.cm ³)	8.3
Electrical Resistivity at 20°	(Ω Cm)	90-95
Thermo Co-efficient Between 0 and 3000°C	softened (°C)	4.10 ⁴
	crushed (°C)	20,8.10 ⁻³
Magnetic Properties	anti-magnetic	

MADE IN SWITZERLAND

COBALTIMA

ULTRA PRECISION

TWEEZERS / FORCEPS

Our special Cobalt steel is harder than stainless steel and has excellent resistance to corrosion and temperatures of up to 500°C (932°F).

TAPERED TIPS WITH MICRO FINE POINTS

Length 4.25" (106mm)

This design has our finest points and is the ultimate tool for microscopy.

Part#	Material	Critical Tip Measurement (CTM)
5-CO	Cobalt	.002"X .0004" .05mm X .01mm

TAPERED TIPS WITH MICRO FINE POINTS

Length 4.25" (106mm)

This design has micro fine points and is the ideal tool for microscopy.

Part#	Material	Critical Tip Measurement (CTM)
4-CO	Cobalt	.0024"X .0008" .06mm X .02mm

TAPERED TIPS WITH STRONG FINE POINTS

Length 4.75" (119mm)

Used for microscopy, this tool has stronger points than the 5-CO or 4-CO.

Part#	Material	Critical Tip Measurement (CTM)
2-CO	Cobalt	.009"X .0039" .24mm X .1mm

STRAIGHT TIPS WITH VERY FINE POINTS

Length 4.75" (119mm)

Very popular design for handling and placing of small parts.

Part#	Material	Critical Tip Measurement (CTM)
3-CO	Cobalt	.0031"X .0016" .08mm X .04mm

COBALTIMA | MADE IN SWITZERLAND

TWEEZERS / FORCEPS ★★★★★ ULTRA PRECISION

The radiused inside edges protect parts from scratching, while the outside finger grooves provide extra grip and feel when handling very small parts.

STRAIGHT TIPS WITH VERY FINE POINTS

Length 4.25" (106mm)

Our most popular design for all types of micro assembly.

Part#	Material	Critical Tip Measurement (CTM)
3C-CO	Cobalt	.0031"X .0016" .08mm X .04mm

10° OFFSET TIPS WITH MICRO FINE POINTS

Length 4.5" (112mm)

The offset design offers better visibility in dense areas.

Part#	Material	Critical Tip Measurement (CTM)
5A-CO	Cobalt	.0024"X .0008" .06mm X .02mm

45° BENT TIPS WITH MICRO FINE POINTS

Length 4.5" (112mm)

The bent tips are helpful when reaching into confined areas.

Part#	Material	Critical Tip Measurement (CTM)
51-CO	Cobalt	.0020"X .0004" .05mm X .01mm

45° CURVED TIPS WITH VERY FINE POINTS

Length 4.5" (112mm)

Very popular design for handling and placing of small parts.

Part#	Material	Critical Tip Measurement (CTM)
7-CO	Cobalt	.0027"X .0012" .07mm X .03mm
7B-CO	Cobalt	Serrated Tips .0027"X .0012" .07mm X .03mm

MADE IN SWITZERLAND

★★★★★ ULTRA PRECISION

COBALTIMA MINIATURE TWEEZERS / FORCEPS

These miniature tweezers are designed for work under a microscope and engineered to fit small hands. The radiused inside edges protect parts from scratching.

TAPERED TIPS WITH MICRO FINE POINTS

Length 3.13" (78mm)

Part#	Material		Critical Tip Measurement (CTM)
M-5-CO	Cobalt		.0020"X .0004" .05mm X .01mm
M-5-CO-ET	Cobalt	Ergo-Tweezer®	.0020"X .0004" .05mm X .01mm

STRAIGHT TIPS WITH FINE POINTS

Length 3.13" (78mm)

Part#	Material		Critical Tip Measurement (CTM)
M-3-CO	Cobalt		.0037"X .0016" .08mm X .04mm
M-3-CO-ET	Cobalt	Ergo-Tweezer®	.0037"X .0016" .08mm X .04mm

75° ANGLED TIPS WITH SHARP POINTS

M-6-CO	Cobalt		.0027"X .0012" .07mm X .03mm

EXOTIC METALS/COATINGS TWEEZERS

Several of our most popular style tweezers are now offered in alternative materials that add value compared to the standard tweezer metals.

SUPER NEVERUST®

Stronger than our 'SA' material

Hard
pg. 67

Non-Magnetic
Will not Oxidize
Resists most acids

DIAMOND TIPPED

Neverust® material

Harder
pg. 68

Stronger than Super Neverust®
Anti-Magnetic
Will not Oxidize
Resists most acids

CERAMIC COATED

Stainless Steel

Harder
pg. 69

Stronger than Diamond Tipped (Cerakote™ C0105)
Stainless Steel – Magnetic (AISI 440)
Temperature resistant to 1600°F
Resists most acids

TITANIUM

Light Weight

Hardest
pg. 70

Soldering Applications - Solder will not adhere to tweezers
Temperature Resistant to 430°C (806°F)
Stronger than Super Neverust® or Diamond Tipped
Non-Magnetic
Will not Oxidize
Resists most acids

PTFE Coated

Non-Stick Material

Soft
pg. 71

Sensitive Applications - Non-Stick material helpful when handling delicate materials
PTFE Coating applied on the first 1.5" (37.5mm) of the tips.
Prevents marring and scratching (metal to metal) contact.

PRECISION

EXTREME

SUPER NEVERUST®

EXOTIC METALS/COATINGS

Super Neverust® (AISI 904L) is non-magnetic and stronger than the standard 'SA' material. It will not oxidize and it resists most acids.

TAPERED TIPS WITH EXTRA FINE POINTS

Length 4.38" (109mm)

STANDARD STYLE TWEEZERS

STANDARD TWEEZERS

The following pages feature standard style tweezers. Most styles are available in three quality levels and materials. The stars are used to designate the quality level.

★★★ Three Star High Precision Grade

Three Star High Precision Grade tweezers are manufactured in Switzerland with high precision points. They are the perfect choice when working under 5X to 10x magnification.

★★ Two Star "PI" Fine Precision Grade

Two Star Fine Precision Grade "PI" tweezers are manufactured with fine precision points at a lower cost.

★ One Star "SE" General Precision Grade

One Star General Precision Grade "SE" tweezers are manufactured for general purpose use when magnification is not required

Materials

Stainless Steel, Anti-Magnetic - Code "SA" have superior anti-magnetic, anti-acid and anti-corrosion properties. Three Star tweezers feature NEVERUST® stainless steel.

Stainless Steel - Code "S" have a higher carbon content and harder tips than the "SA" material. This material will rust under extreme exposure and is highly magnetic.

Carbon Steel - No Code - The tips are flame hardened for long life and are highly magnetic with low rust resistance.

HIGH
FINE
GENERAL

STRAIGHT TAPERED TWEEZERS

The tapered tips on these tweezers afford the operator enhanced visibility when working under a microscope. The '5' style has the smallest points making it ideal for working under high magnification. The '2' style offers much stronger points than the '5' or '4' style.

SMALL PARTS HANDLING TWEEZERS

SMALL PARTS HANDLING

These tweezers were developed to handle very small wires and parts. Each has its own unique characteristics.

PRECISION

HIGH

PADDLE TIPPED TWEEZERS

These tweezers are specifically designed to handle surface mount components. They are also ideal for handling very small rectangular items. The paddles add more 'surface contact' for greater control. By design, the tips are much more robust than a pointed tweezer, hence a longer life.

ANGULATED - ANTI-CRUSH DEVICE

Length 4.5" (115mm)

102A-SA

The wider point is designed for easy manipulation of most chips and miniature components. Anti-crush device has been added to reduce chip breakage. They are made of Anti-Magnetic Neverust® Stainless Steel.

CURVED

Length 4.25" (110mm)

103-SA (.060" x .024" Paddle)

123-SA (.028" x .020" Paddle)

The angled tips are very helpful for placing many types of S.M.D. resistors and capacitors. They are made of Anti-Magnetic neverust Stainless Steel (AISI 316L).

OFF-SET

Length 4.5" (115mm)

104-SA

The wider paddle points provide perfect control when manipulating and placing SOT-89 transistors and monolithic chip capacitors. It is made of Anti-Magnetic Neverust® Stainless Steel.

ANGLED

Length 4.5" (115mm)

109-SA

The small points are set at a 45° angle for working in dense areas. They are made of Anti-Magnetic Stainless Steel (AISI 316L).

S.M.D. HANDLING TWEEZERS

HIGH
PRECISION ★★★

The following tweezers have small grooves or holes in the tips for handling small wires.

TRANSVERSE

Length 4.25" (110mm)

110-SA ★★★

The small groove on the inside of the points provides better control when placing small parts and wires. It is made of Anti-Magnetic Neverust® Stainless Steel.

STRAIGHT

Length 5.5" (140mm)

121-SA ★★★

The thin flat tips are cut at an angle making this tweezer ideal for picking parts from a Gel Pak. It is made of Anti-Magnetic Neverust® Stainless Steel.

CURVED

Length 4.25" (110mm)

111-SA ★★★

The angle of the tips and the small .02" (.5mm) hole will firmly hold many types of SMD components. It is made of Anti-Magnetic Neverust® Stainless Steel.

CURVED

Length 4.25" (110mm)

115-SA ★★★

The .02" (.5mm) groove on the inside of the tip is designed on an angle for holding and placing cylindrical devices. It is made of Anti-Magnetic Neverust® Stainless Steel.

PRECISION

HIGH

S.M.D. HANDLING TWEEZERS

The following tweezers have grooved tips or holes in the tips for handling small wires or cylindrical devices or, tips that meet in a parallel fashion. While they were designed for surface mount applications, they may be uniquely qualified to handle a variety of tasks where small items are being handled.

STRAIGHT

Length 4.25" (110mm)

116-SA ★★★

The tips have a .04" (1mm) groove for handling small cylindrical devices. It is made of Anti-Magnetic Neverust® Stainless Steel.

BENT TIP

Length 4.25" (110mm)

125-SA ★★★

The tips have a .02" (.5mm) slot in the end which is great for picking and placing of 402 resistors. It is made of Anti-Magnetic Neverust® Stainless Steel.

STRAIGHT TIP

Length 4.5" (115mm)

122-SA ★★★

The strong flat tips will firmly hold components when desoldering. It is made of Anti-Magnetic Neverust® Stainless Steel.

CURVED TIP

Length 4.25" (110mm)

124-SA ★★★

The unique shape tips are helpful in placing SOT-23 and TO-236 packages. It is made of Anti-Magnetic Neverust® Stainless Steel.

STRAIGHT TIP

Length 4.25" (110mm)

126-SA ★★★

The fine tip and parallel closing jaws are very useful for routing jumper wires on PC boards. It is made of Anti-Magnetic Neverust® Stainless Steel.

SMALL PARTS HANDLING TWEEZERS

ULTRA
HIGH
GENERAL

PRECISION

These tweezers have been developed to handle very specific tasks. It is important to note we encourage the tip dimensions to fit your exact application.

FOR HOLDING CYLINDRICAL PARTS

Length 4.5" (115mm)

815-SA-SE ★

This tweezer can handle many types of round components and electronic devices. The inside hole diameter is .060" (1.5mm). It is made of Anti-Magnetic Stainless Steel.

FOR HOLDING CYLINDRICAL PARTS

Length 4.5" (115mm)

815B-SA-SE ★

This tweezer can handle many types of round components and electronic devices. The inside hole diameter is .060" (1.5mm). The 45° offset tip is great for confined areas. It is made of Anti-Magnetic Stainless Steel.

FOR HOLDING SMALL WIRES

Length 4.25" (110mm)

40-S ★★ ★

This tweezer was specifically made to hold very small wires via the .015" (.38mm) diameter hole near the tips. It is made of Stainless Steel.

FOR HOLDING SMALL WIRES

Length 5" (127mm)

116-CF ★★ ★★ ★

This straight Carbon Fiber tipped tweezer features a .039" (1mm) hole in the tips. This tool is ideal for handling delicate wires and small screws. The body is made of stainless steel. The tips are conductive (10² ohms/sq). **Replacement tips - 116-CF-RTX**

FOR HOLDING SMALL SCREWS

Length 6.5" (165mm)

31B-SA-SE ★

The special grooves in the tips hold small screws. It is ideal for 'starting' the screws. Also useful when working in dense and hard to reach areas. It is made of Anti-Magnetic Stainless Steel.

WAFER HANDLING TWEEZERS

WAFER HANDLING

These tweezers are ideal for handling very thin wafers up to and exceeding 8" in diameter. The large, thin, flat tips easily slip under and securely hold the wafers. They also feature a special engaging slot, which facilitates handling. Each wafer tweezer is available in a variety of head styles and made of anti-magnetic Stainless Steel.

WAFER HANDLING TWEEZERS

FINE
PRECISION ★★

Our Wafer Handling Tweezers include a special engaging slot for easy handling of wafers.

PRECISION

ULTRA

PEEK REPLACEABLE TIP TWEEZERS

These tweezers are constructed from a Neverust® stainless steel anti-magnetic frame and feature PEEK tips. PEEK is a high temperature thermoplastic with excellent chemical resistance. Inert to all common solvents, it resists a wide range of inorganic liquids. These tools have a working temperature of 249°C (480°F). Peek is static dissipative (10^7 ohms/sq). Peek tweezers are designed for safe handling of delicate parts and feature finger serrations for more control.

CUTTING TWEEZERS

CUTTING TWEEZERS

Cutting tweezers are used in a variety of manufacturing applications, including hearing aids, stents, pacemakers and many applications in the miniature electronics field.

PRECISION

HIGH
FINEPRECISION CUTTING
TWEEZERS

The 15A-GW series angled tip cutting tweezer is ideal for general purpose cutting of soft wire up to 0.010". This tool is considered a tip cutter in that the blades meet most predominantly at the tips. All of the force applied to the tweezer gets transferred to the very tip of the tool. The exception is the 'PB' adder, featuring parallel cutting edges. The cut is 'maximum flush' which leaves a very small 'pinch' on the wire.

15A-GW

Length 4.5" (115mm)

Most common cutting tweezer design in use today. Recommended materials which this tweezer will safely cut are soft copper, gold, silver and magnet wire not larger than .010 in diameter. Flat blades. The epoxy coating is ESD safe (10^5 - 10^6 ohms/sq) and also prevents oxidation. Made in Switzerland.

Also Available

- 15A-GW-OF - Optimum-Flush cutting blades
- 15A-GW-PB - Parallel cutting blades
- 15A-GW-M - No epoxy coating
- 15A-GW-S - Stainless Steel (no epoxy coating)
- 15A-GW-ET - With ergonomic cushion grip - Shown on pg. 121

15A-GW-PI

Length 4.5" (115mm)

Same as above with a slightly larger head and face. It does not have Epoxy coating. Carbon steel with flame hardened flat blades.

PRECISION CUTTING TWEEZERS

HIGH
PRECISION ★★★

The 15A-RW series angled round tip cutting tweezer is ideal for general purpose cutting of soft wire up to 0.010". The cutting blade is much shorter than the 15A-GW and the top of the head has been rounded for better visibility. The cut is 'maximum flush' which leaves a very small 'pinch' on the wire.

15A-RW

Length 4.5"(115mm)

With fine tips and smaller cutting blades, this cutting tweezer can fit into small areas other cutters cannot. Comes with Epoxy coating ESD safe (10^5 - 10^6 ohms/sq) to prevent rusting. Maximum cutting capacity 32 AWG .008 in. Made in Switzerland.

Also Available

- 15A-RW-OF - Optimum-Flush cutting blades
- 15A-RW-PB - Parallel cutting blades - Shown Below
- 15A-RW-M - No epoxy coating
- 15A-RW-S - Stainless Steel (no epoxy coating)
- 15A-RW-ET - With ergonomic cushion grip - Shown on pg. 121

15A-RW-PB

PARALLEL BLADES

Length 4.5"(115mm)

Same as above with parallel cutting blades. Carbon steel with corrosion preventing epoxy coating, ESD safe (10^5 - 10^6 ohms/sq). Maximum cutting capacity 32 AWG .008 soft copper, gold, silver and magnet wire. Extremely useful in trimming soft silicon or plastic flashing. Made in Switzerland.

PRECISION

HIGH

PRECISION CUTTING TWEEZERS

Variations of the standard 15A-GW are shown below. The cutting capacity for these tools are .010" soft wire.

15A-SW**RADIUS FACED**

Length 4.5" (115mm)

Similar to the 15A-GW with rounded blades. Designed to cut soft copper wire, gold, silver and magnet wire. Carbon Steel with corrosion preventing epoxy coating ESD safe (10^5 - 10^6 ohms/sq). Made in Switzerland.

**15A-C****SHORT FINE BLADE**

Length 4.5" (115mm)

Very fine cutting tweezer. Can be used either vertically or horizontally. Short .275in blade. Excellent for use in difficult cutting areas. Carbon Steel with corrosion preventing epoxy coating ESD safe (10^5 - 10^6 ohms/sq). Made in Switzerland.

**15A-RW-ET****ERGONOMIC**

Length 4.5" (115mm)

Same as the 15A-RW with an added Ergonomic cushion grip designed to combat operator fatigue. Also acts as a heat shield. Made in Switzerland.

**15A-GW-ET****ERGONOMIC**

Length 4.5" (115mm)

Same as the 15A-GW with an added Ergonomic cushion grip designed to combat operator fatigue. Used in Electronic, Military and Biomedical assembly applications where prolonged use is required. Made in Switzerland.

PRECISION CUTTING TWEEZERS

HIGH
PRECISION ★★★

The following tweezers are application specific and primarily used for work in a restricted area.

14A-GW

SLIM HIGH PRECISION

Length 4.38" (113mm)

Small head and 100° angle enables work to be done in confined areas and allows greater surface clearance. High Carbon steel designed to cut plastic and silicon flashing as well as soft copper wire no greater than .010. Made in Switzerland.

14A-N

LONG PRECISION

Length 4.5" (115mm)

Thin, fine cutting blades enables the tool to be used either vertically or horizontally. Durable carbon steel cutting edges. Maximum cutting capacity .005. Thinner blade design for lightweight and easy handling. Made in Switzerland.

15

TRANSVERSE END

Length 4.5" (115mm)

PRECISION

HIGH

PRECISION CUTTING TWEEZERS

For those applications which require work in a restricted area or under magnification, the following cutting tweezers allow the accessibility needed. The 52-MW, 53-MW and 54-MW are our smallest cutters.

52-MW**HIGH PRECISION MICRO POINTS****Length 4.5" (115mm)**

Excellent for working in dense access areas. Durable carbon steel with black conductive ESD safe (10^5 - 10^6 ohms/sq) corrosion inhibitor. Cutting capacity .005 soft wire and flashings. Made in Switzerland.

CUTTING CAPACITY .005" (.13mm)

**54-MW****HIGH PRECISION MICRO ANGLED POINTS****Length 4.25" (110mm)**

Designed for maximum visibility when working under magnification. Black conductive ESD safe (10^5 - 10^6 ohms/sq) corrosion inhibitor and sharp carbon steel cutting blades. Excellent for work in confined applications. Made in Switzerland.

CUTTING CAPACITY .008" (.20mm)

**55-MW****ULTRA FINE CUTTING BLADES****Length 4.5" (115mm)**

The very finest and smallest cutting blades available. Durable carbon steel blades and black conductive ESD safe (10^5 - 10^6 ohms/sq) epoxy coating to reduce corrosion and rust. Ultra-fine point makes this cutting tweezer easily fit into areas traditional cutting tweezer cannot fit. Maximum cutting capacity .005 soft wire and flashings. Light weight and easy to manipulate. Made in Switzerland.

CUTTING CAPACITY .005" (.13mm)

PRECISION WIRE STRIPPING TWEEZERS

ULTRA
PRECISION ★★★★★

Unlike generic wire strippers, the following tools are 'precision' wire strippers. The 15A-ST-PE-XX and the 15A-ST-PE-XX-X tools are individually manufactured for a specific size wire.

15A-ST-PE-XX

INSULATED WIRE

Length 4.5"(115mm)

70° angulated stripping tweezer will strip PTFE and other coated wire exactly to AWG gauge without nicking. The unique 'cutting slot' prevents wire alignment issues thus accelerating the process. It is made of carbon steel with flame hardened edges and is epoxy coated to prevent oxidation. It will strip wires from 30AWG to 46AWG. Simply add the wire size to the 15A-ST-PE (i.e. 15A-ST-PE-30 for 30AWG)

15A-ST-PE-XX-X

MAGNET WIRE

Length 4.5"(115mm)

70° angulated stripping tweezer designed to strip Magnet Wire to AWG gauge without nicking. The unique 'cutting slot' prevents wire alignment issues thus accelerating the process. It is made of carbon steel with flame hardened edges and is epoxy coated to prevent oxidation.

NEW
ITEM

PRECISION

ULTRA

PRECISION WIRE STRIPPING PLIERS

The 510E-US will strip from 18-30AWG wire and, unlike other strippers which can only cut two sides of the insulation, this tool cuts four sides, thus making a very 'clean' strip. The 502E-US-XX is individually manufactured for a specific size wire (insulate).

510E-US

Length 5.5"(137.5mm)

Adjustable V-notch stripper is a precision wire stripper with locking set-screw and can be adjusted for stripping 18-30AWG wire. It features a molded static dissipative (10^9 ohms/sq) ergonomic handle with dual leaf springs for smooth action.

502E-US-XX

Length 5.5"(137.5mm)

High precision stripping plier is ideal for stripping PTFE coated wires. It features molded ergonomic static dissipative (10^9 ohms/sq) grips with dual leaf springs for smooth action. To order, specify the wire gauge size by indicating the gauge at the end of the reference number (i.e 502E-US-030 for AWG 30). Available in 22, 24, 26, 28, and 30 AWG.

SCISSORS | TUNGSTEN CARBIDE BLADES

STAINLESS STEEL ★★★★★ EXTREME PRECISION

These extremely precise stainless steel scissors are ideal for delicate applications. They feature Tungsten Carbide blades which have two times the tensile strength of stainless steel and double the density, producing long life. Acid-proof, sterilizable and rust proof.

Miniature Self-Opening Scissors For Confined Areas

Part #	Shape	Length	Blade Length
346-6-HT	Straight	5.50" (137mm)	.63" (15.90mm)
347-6-HT	Curved	6.00" (150mm)	.56" (14.23mm)

Short Thin Blade - Tight Intricate Work

Part #	Shape	Length	Blade Length
279-HT	Straight	3.50" (88mm)	.8" (20mm)

Medium Thin Blade - Intricate Work

Part #	Shape	Length	Blade Length
271-HT	Straight	4.50" (113mm)	1.17" (29.70mm)
270-HT	60°	4.50" (113mm)	1.27" (32.38mm)

Extra Long Blades - Round Blunt Tips For Safety

Part #	Shape	Length	Blade Length
371A	Straight	6.00" (150mm)	2" (50mm)
371B	20°	6.00" (150mm)	2" (50mm)

STAINLESS STEEL | HEMOSTATS

★★ FINE PRECISION

Precision hemostats come with or without vinyl-coated handles. Those without vinyl may be autoclaved. They are made of stainless steel and feature a locking mechanism.

35-SE

Length 5" (125mm)

Locking hemostat with straight serrated jaws, cleanroom safe.
Also available in non-serrated 35-A-SE.

35PH

Length 5" (125mm)

Locking hemostat with straight serrated jaws and vinyl-coated handles.

36-SE

Length 5" (125mm)

Locking hemostat with 25° curved serrated jaws, cleanroom safe.

36PH

Length 5" (125mm)

Locking hemostat with 25° curved serrated jaws and vinyl-coated handles.

37-SE

Length 6" (150mm)

Locking hemostat with straight serrated jaws, cleanroom safe.

37PH

Length 6" (150mm)

Locking hemostat with straight serrated jaws and vinyl-coated handles.

HEMOSTATS | STAINLESS STEEL

★ ★ FINE PRECISION

38-SE

Length 6" (150mm)

Locking hemostat with 30° curved serrated jaws and cleanroom safe.

38PH

Length 6" (150mm)

Locking hemostat with 30° curved serrated jaws has vinyl-coated handles.

39-SE

Length 8" (200mm)

Locking hemostat with straight serrated jaws and cleanroom safe.

39PH

Length 8" (200mm)

Locking hemostat with straight serrated jaws has vinyl-coated handles.

40-SE

Length 8" (200mm)

Locking hemostat with 30° curved serrated jaws and cleanroom safe.

40PH

Length 8" (200mm)

Locking hemostat with 30° curved serrated jaws has vinyl-coated handles.

Mosquito clamps are used to clamp small blood vessels. They are made of autoclavable surgical stainless steel and feature a locking mechanism.

BRUSHES | INSTRUMENT CLEANING

SPECIALTY ★★★★★ EXTREME PRECISION

Instrument Cleaning Brushes

Designed for general cleaning in tight areas. The handle is .25" (6.25mm) in diameter. Fibers are mechanically clamped into the stainless steel tube and inserted in the Acetal handle. Available with straight or bent tips.

210S-N

*210B-H

210S-S

*210B-S

Heat Resistant Brushes

The nylon fibers are epoxy set into the Acetal handles with a high temperature adhesive to resist deterioration in an autoclave. The soft non-shedding nylon fibers are perfect for working on delicate parts. Brushes should be cleaned prior to cleanroom use.

211A-N

211B-N

211C-N

211D-N

Part #	Shape	Length	Blade Length
*210B-H	Bent 50°	Horse Hair	5.50" (138mm)
210B-N	Bent 50°	Nylon	5.50" (138mm)
210B-P	Bent 50°	Hog Hair	5.50" (138mm)
210B-S	Bent 50°	Stainless Steel	5.50" (138mm)
*210S-H	Straight	Horse Hair	5.75" (144mm)
210S-N	Straight	Nylon	5.75" (144mm)
210S-P	Straight	Hog Hair	5.75" (144mm)
210S-S	Straight	Stainless Steel	5.75" (144mm)

Part #	Shape	Length	Blade Length
211A-N	Straight	Nylon	4.50" (115mm)
211B-N	Straight	Nylon	4.50" (115mm)
211C-N	Straight	Nylon	4.50" (115mm)
211D-N	Straight	Nylon	4.50" (115mm)

Materials

Hog Hair: Strong and stiff with natural taper and split end. Water resistant and heat tolerant to 500°F.

***Horse Hair:** Soft and slightly stiff. Used for scratch-free dry brushing. Heat resistant to 370°F. ESD Safe (10^8 - 10^{11} ohms/sq)

Nylon: Resilient and durable. Impervious to solvents and common chemicals. Resistant to bacteria and heat resistance to 250°F.

Stainless Steel: Resistant to heat, rust and corrosion. Used for wet or dry applications.

CLEANROOM SAFE | B R U S H E S

★★★★ EXTREME PRECISION | SPECIALTY

ESD Safe Brushes

(10^8 - 10^{11} ohms/sq)

Made with stainless steel handles and horse hair bristles to provide ESD protection. The bristles are mechanically clamped into the handle for maximum fiber retention without the use of adhesives which could contaminate the work area. Soft and slightly stiff, heat resistant to 370°F.

212A-H 212B-H 212C-H 212D-H

Part#	Bristles	Length
212A-H	Horse Hair	3.5" (88mm)
212B-H	Horse Hair	4.75" (120mm)
212C-H	Horse Hair	4.75" (120mm)
212D-H	Horse Hair	6" (150mm)

Cleanroom Safe Brushes

(10^8 ohms/sq)

Designed for general cleaning in tight areas. Bristles are mechanically clamped into the handle for maximum fiber retention without the use of adhesives which could contaminate the work area. New Stratigo9 fibers are similar to nylon fibers, except they are Static Dissipative.

213A-N 213B-N 213C-N 213D-N

Part#	Bristles	Length
213A-N	Stratigo9	3.5" (88mm)
213B-N	Stratigo9	4.75" (120mm)
213C-N	Stratigo9	4.75" (120mm)
213D-N	Stratigo9	6" (150mm)

Materials

Horse Hair: Soft and slightly stiff. Used for scratch-free dry brushing. Heat resistant to 370°F. ESD Safe (10^8 - 10^{11} ohms/sq)

Stratigo9: A static dissipative acetal which is as durable as nylon, thick enough to perform mechanical work and does not shed or slough and is cleanroom compatible.

BRUSHES | SCRATCH/CLEANING

SPECIALTY ★★ FINE PRECISION

Fiberglass Cleaning Brush

Part#	Length	Diameter
264	5.25" (131mm)	.05" (1.25mm)

Fiberglass refillable cleaning brush has a long thin handle. It is ideal for use in very confined areas, which are not accessible with larger diameter brushes. Refill **264A**

Brush Kit

Part#	Length	Diameter
262	4.25" (106mm)	.13" (3mm)

This kit includes one handle and four replaceable brushes (**265A, 266A, 267A, 268A**).

Fiberglass Scratch Brush

Part#	Length	Diameter
263	4.25" (106mm)	.63" (15.75mm)

Fiberglass retractable and refillable scratch brush with plastic handle. Very useful when cleaning and polishing. Refill - **263A**

Nylon Bench Brush

Part#	Length	Width
186	8.5" (213mm)	.5" (13mm)

Bench brush with wooden handle has four rows of white nylon bristles 3.75" (93.75mm) long. The bristles will not shed.

Scratch Brushes

Part#	Material	Length	Diameter	Refill
265	Brass	4.75" (120mm)	.13" (3mm)	265A
266	Steel	4.75" (120mm)	.13" (3mm)	266A
267	Fiberglass	4.75" (120mm)	.13" (3mm)	267A
268	Nylon	4.75" (120mm)	.13" (3mm)	268A

Retractable and refillable scratch brushes have a plastic handle. They can be used for fine de-burring, polishing, rust removal, or cleaning and erasing the chemical etching processes. They are excellent for pre-solder and contact cleaning.

Bench Brushes - ESD Safe (10⁸-10¹¹) ohms/sq

Part#	Length	Width	Firmness
187	10" (250mm)	.5" (13mm)	Soft
189	10" (250mm)	.5" (13mm)	Half Soft
190	10" (250mm)	.5" (13mm)	Half Hard

Soft bench brush is made of high grade bristles with a wooden handle. There are four rows of bristles 4.5" (112.5mm) long. They will not shed.

Applicator Brush - ESD Safe (10⁸-10¹¹) ohms/sq

Part#	Length	Diameter
214-H	4.5" (115mm)	.188" (5mm)

Double-ended applicator brush has a short flat end and an extra stiff chiseled end. The bristles are soft horse hair.

Applicator Brush - ESD Safe (10⁸-10¹¹) ohms/sq

Part#	Length	Diameter
215-H	4.5" (115mm)	.375" (9mm)

Double-ended applicator brush has a short flat end and an extra stiff chiseled end. The bristles are soft horse hair.

ESD SAFE | BRUSHES

LAB SPECIFIC PROBES

While the stainless steel probes below are specifically designed for labs, they also fit a variety of applications.

Knurled Handle Probe ★★ Length 5" (150mm)

Part#	Tip Size	Style
333B	.02" (.5mm)	Straight

Knurled Handle Probe ★★ Length 4.875" (122mm)

Part#	Tip Size	Style
333C	.02" (.5mm)	55°

Stainless Steel Handle Probe ★★ Length 6" (150mm)

Part#	Tip Size	Style
333D	.055" (1.38mm)	45°

Plastic Handle Probe ★★ Length 6" (150mm)

Part#	Tip Size	Style
333	.001" (.025mm)	Straight

Plastic Handle Probe ★ Length 5.75" (144mm)

Part#	Tip Size	Style
333F	.025" (.63mm)	45°

Ligature Probe ★ Length 6" (150mm)

Part#	Tip Size	Style
333E	.04" X .4" (1mm X 10mm)	Slot

These are used to explore and gauge the depth of non-visible cavities.
The eye may be used for carrying ligatures.

TEST AND MEASURING | MAGNIFIERS & LOUPES

★★★★★ ULTRA PRECISION
★★★★★ HIGH PRECISION

455A ★★★

The **Super Optivisor** has a magnifying power of 2.2 and can be used for precise viewing with the added 3.3 power lens. The exclusive clear-view lens has no center post to increase viewing. Shatter-resistant precision and optical lens bring the smallest detail up to a larger and sharper image. Comes with an adjustable headband and can be worn over regular glasses.

401 ★★★

Magna-Life illuminated Optical Magnifier is a 4X power hand held magnifier. Lens dimension is 1.5" (37.5mm) square. Perfect for quality control and inspection personnel. Comes in a durable impact resistant case. Length 4.75" (120mm)

407 ★★★

Magna-Life illuminated Optical Magnifier is a 10X power hand held magnifier. Lens dimension is 1.5" (37.5mm) square. Perfect for quality control and inspection personnel. Comes in a durable impact resistant case. Length 4.85" (121.5mm)

405 - 410 - 422 Eye Loupes ★★★★★

Used for magnification in assembly or inspection. Two element optical glass construction. Bright, sharp focus loupes with 360° clear acrylic base to admit light from all directions and a wide range of view.

POCKET BEEPER | TEST AND MEASURING

★★★ HIGH PRECISION

PB-1

As a continuity tester, Pocket-Beeper affords the operator quick discernment of point-to-point continuity testing by a clear audible tone. As a transistor and diode tester, the Pocket-Beeper analyzes "in circuit" junctions for go/no go normality.

The Model PB-1 indicates leakage, short or open conditions of transistors. Pocket-Beeper's portability, combined with its unique self-contained design and rugged enclosure, make it ideal for production and field service applications.

Applications:

- Point-to-point continuity
- Rapid in-circuit scanning of transistors and diodes
- Detects shorts, open and leakage in components
- Positive go/no go testing
- Field servicing and maintenance

Features:

- Automatic power shut-off when not in use
- Audibly indicates conditions
- Low power drain for long battery life
- Will not harm any solid-state device or delicate circuits

Specifications:

- Power (internally supplied) 1.5 VDC "C" dry cell
- Probe signal voltage 1.6 volts peak-to-peak
- Dimensions: 4" high X 1" deep X 2" wide
- Ambient temperature range +10°F to +120°F
- Weight: 12 ounces maximum

Replacement Probes: PB-1L

IntelliTweeze®

TM-500

Features

0.2-0.5% base measurement accuracy
Manual C,R,L,Z and ESR modes
Adjustable test signal levels
Diode Polarity/Short Testing
Secondary D,Q and ESR parameters

Physical Specifications

Operating Temperature:	0°C to +50°C
Storage Temperature:	-40°C to +70°C
Relative Humidity:	0% to 90% (0°C to 35°C) 0% to 70% (35°C to 55°C)
Altitude Operating:	0-2000 meters
Battery Type:	3.7V LIPO rechargeable 150 mA
Typical Charge Time:	2.5 Hours
Electromagnetic Compatibility (EMC):	Susceptibility and Emission: CE85
Size:	14.0 x 2.5 x 3.0 cm (3.94 x 0.9 x 1.18 in)
Weight:	53 grams (0.11LB)
Warranty:	1 year

Basic Specifications

Measured Parameters:	L,C,R,ESR,D,Q
Measuring Frequencies:	100 Hz, 120 Hz, 1 kHz, 10 kHz
Measurement Rate:	1 time per second
Resistance:	0.05 Ohms to 9.9 Mohms
Capacitance:	0.5 pF to 4.999 uF
Inductance:	0.5 uH to 999 mH
Dissipation Factor:	0.001 to 1000

Accuracy Specifications

Accuracy is specified at 18°C to 28°C (64°F to 82°F), with relative humidity to 90%

Resistance Accuracy:	0.2% in range 100 R to 10 K, 0.5% in range 1 R to 1 M
Capacitance Accuracy:	0.2% in range 10 nF to 10 uF, 0.5% in range 100 pF to 1mF
Inductance Accuracy:	0.2% in range 10 mH to 100 mH, 0.5% in range 100 uH to 1H

Technical Specifications

AC test mode Test frequency:	1 kHz, 10 kHz, 120 Hz, 100 Hz
Test frequency accuracy:	50 PPM (0.005%)
Test signal level:	0.5/1.0 +/-5% Vrms Sine wave
Source impedance:	100 Ohms +/- 1%

Replacement Tips

Part#	Shape
TM-500-BX	Bent
TM-500-X	Straight
TM-500-PX	Straight,Fine

Intelligently designed to make locating a faulty component a breeze.

The new IntelliTweeze® features a unique patented mechanical and electronic design which incorporates a built-in direct precision SMD probe designed for component evaluation on the production line, component impedance testing and sorting of SMD components.

EXCELTA[®]

VACUUM SYSTEMS

VACUUM SYSTEMS

Hi-Performance vacuum systems are ideal for handling wafers, disk media, flat panels, or any item with a flat hard surface.

★★★★★ ULTRA PRECISION
★★★★★ EXTREME PRECISION
★★★ HIGH PRECISION

Quality Vacuum Systems

Continuous Vacuum Systems

Roto-Pic® - Vacuum system features thumb-wheel control to rotate tip 360° for perfect alignment of items without rotating the wrist.

4000-ST - Complete work bench general purpose vacuum kit.

4000-HP - Complete work bench high performance vacuum kit.

Portable Vacuum Systems

Pen-Vac® - Self-contained 6" vacuum pens with storage compartments in most pens for storage of various tips.

Handi-Vac® - Self-contained vacuum bulb kit for convenient use anytime, anywhere.

VACUUM | ROTO-PIC® SYSTEM

HANDLING TOOLS | ★★★★★ ULTRA PRECISION

The most revolutionary vacuum pick-up available. Designed to reduce manual handling of both chips and wafers. The Roto-Pic® has a smooth positive hold-and-release slide bar. The round nose wheel rotates 360° so components can be picked up and aligned with ease. Easily replaceable tips come in a variety of sizes and silicon rubber cups which can be inserted on Roto-Pic for pick-up and manipulation.

VACUUM KITS

2000RK Complete Vacuum System Kit
Complete vacuum handling system includes one each of the following kits:
2000R, 2000P, 2000WP, 2000DA

2000R Vacuum System Kit
Contains one each of the following:
2000A, 2000V, 2000C

2000P Probe Kit
Contains one each of the following probes:
2020, 2021, 2022, 2023, 2024

2000WP Vacuum Cup Kit
Contains one each of the following cup assemblies:
2050, 2051, 2052, 2060, 2071

2000DA Vacuum Tip Kit
Contains one each of the following tip assemblies:
2040, 2041, 2043, 2044

4000-ST ★★★★★

General Purpose Vacuum System

A general purpose vacuum handling tool which plugs directly into 110 VAC. This compact unit will handle most of the surface mount components used in the industry today. The long life diaphragm vacuum pump generates up to 10 inches of mercury with an open air flow of 2.3 lpm. The unit connects to ground automatically with a three-wire power cord.

The 4000-ST comes complete with the following features:

- Whisper-quiet operation.
- 5 feet of coiled vacuum hose.
- Vacuum pick-up handpiece.
- No-skid rubber feet.
- Produces vacuum of over 10 inches of mercury.
- Side mounted handpiece holder.
- Set of nine vacuum tips: PVS-CB-12, PVS-CB-14, PVS-CB-18, PVS-CB-38, PVB-CB-332, PVB-CB-316, PVB-CB-14, PVB-CB-18, PVB-CB-38.

Individual System Components ★★★★★

4000-H Handle for 4000-HP/ST

4000-RF Replacement Filter for 4000-HP

PV-HV ★★★

Length 3" (75mm)

Handi-Vac® is a vacuum bulb pick-up tool that is simple and easy to use. When the vacuum bulb is squeezed, place the soft suction cup on the part to be handled. A second squeeze releases the part.

Kit Contains:

Hand Piece - PV-HV-B

Probe/Cup Assemblies - PVB-CB-18, PVB-CB-14
PVS-CB-18, PVS-CB-38

PEN-VAC® KITS

★★★ HIGH PRECISION

VACUUM

HANDLING TOOLS

Pen-Vac® and Handi-Vac® tools are ESD Safe with a surface resistivity of 10^{11} - 10^{12} ohms/sq. They are excellent tools for picking up and placing standard and odd size flat surface items. These systems are mechanical, making them extremely portable.

PV-1-ESD-CNX

Length 5" (125mm)

Kit Contains:

Hand Piece - PV-JR
Probe/Cup Assemblies - PVS-CB-12, PVB-CB-12
Other Cups - CB-14, CB-38

PV-2A-ESD

Length 6" (150mm)

Kit Contains:

Hand Piece PV-ST (Rear Storage)
Probe/Cup Assemblies - PVB-CB-18, PVB-CB-14, PVB-CB-38
PVS-CB-18, PVS-CB-14, PVS-CB-38

PV-2-ESD

Length 6" (150mm)

Kit Contains:

Hand Piece PV-ST (Rear Storage)
Probe/Cup Assemblies - PVB-CB-18, PVB-CB-14

PV-3A-ESD

Length 5" (125mm)

Kit Contains:

Hand Piece - PV-JR
Probe/Cup Assemblies - PVB-CB-18, PVB-CB-14, PVB-CB-38
PVS-CB-18, PVS-CB-14, PVS-CB-38

VACUUM | PEN-VAC® HAND PIECES

HANDLING TOOLS | ★★★ HIGH PRECISION

The following hand pieces can be ordered in kit form on page 169, or you can create your own kit by adding cups and probes from page 171.

PV-JR Length 5" (125mm)

Pen-Vac® Junior comes with a handpiece and pocket clip. Depressing the button compresses the bellows to create the vacuum. Great for handling small flat items.

(Replacement hand piece for PV-1-ESD-CNX kit and PV-3A-ESD kit)

PV-ST Length 6" (150mm)

Pen-Vac® Standard comes with a handpiece and pocket clip. Unlike the PV-JR, the PV-ST includes a rear storage compartment for cups and probes. Depressing the button compresses the bellows to create the vacuum. Great for handling small flat items

(Replacement hand piece for PV-2-ESD kit and PV-2A-ESD kit)

PV-HV-B Length 3" (75mm)

Handi-Vac® is a vacuum bulb pick-up tool that is simple and easy to use. When the vacuum bulb is squeezed, place the soft suction cup on the part to be handled. A second squeeze releases the part.

(Replacement hand piece for PV-HV Kit.)

Finest Quality Replacement Cups and Probes

- Cup sizes from .10" (2.5mm) to .75" (18.75mm)
- Made of Buna-N ESD Safe (10^8 - 10^{12} ohms/sq) non-marking material
- Working temperature -5° to 250°F
- Interchangeable with Pen-Vac® Junior, Pen-Vac® Standard, Pen-Vac® Pro, Handi-Vac®, 4000-ST and 4000HP

Straight Probes

Angulated Probes

Cups

Small Tips

Designed for handling very small parts. Tips are made in ESD Safe Acetal Plastic so there is no chance of static or mechanical damage. These small tips are used ONLY with the 4000-ST or 4000HP.
